AHKStrategies Domain Security & Infrastructure Report – October 2025

Overview

This report summarizes the current DNS, email authentication, and security configuration for AHKStrategies.net. All key systems — website, email, and SSL — are active and properly secured. The configuration follows best practices for business-grade reliability and deliverability.

1. DNS Configuration

Record Type	Host	Value	Status
A Record	@	76.76.21.21	■ Active
CNAME	@	cname.vercel-dns.com	■ Active
MX	@	ASPMX.L.GOOGLE.COM (Priority 1)	■ Active

2. Email Authentication (SPF / DKIM / DMARC)

• SPF Record: ■ v=spf1 include:_spf.google.com ~all
• DKIM Record: ■ Google DKIM key added successfully
• DMARC Policy: ■ p=quarantine; rua=mailto:ashraf@ahkstrategies.net

Emails sent from ashraf@ahkstrategies.net are properly authenticated and are no longer reaching spam folders.

3. SSL Certificate and Hosting

The domain is hosted on Vercel infrastructure, which automatically provisions SSL certificates through Let's Encrypt. The HTTPS connection is valid, and the certificate renews automatically every 90 days.

4. Domain Status Summary

Domain	Status	Action
ahkstrategies.net	■ Active – Primary Domain	No action required
www.ahkstrategies.net	■ Active	Redirect to main domain
ahkstrategies.com	■■ Invalid Configuration	Remove if not owned

5. Summary and Recommendations

■ All DNS and email configurations are correctly implemented.
■ SPF, DKIM, and DMARC provide full protection against spoofing and spam.
■ SSL certificate is active and renewing automatically.
■■ Recommendation: Set 'ahkstrategies.net' as the **Primary Domain** in Vercel to unify traffic and

redirections.

Overall Status: AHKStrategies.net infrastructure is stable, secure, and optimized for business communications and web presence.
